The Power of Digital Literacy

Here are the impact of collective efforts in addressing Digital challenges in education

Target Groups

- Teachers
- School Leaders
- Students
- Families

Our objective

We aim to raise awareness among educators about the potential of integrating Digital and Media Literacy topics within the subject curricula.
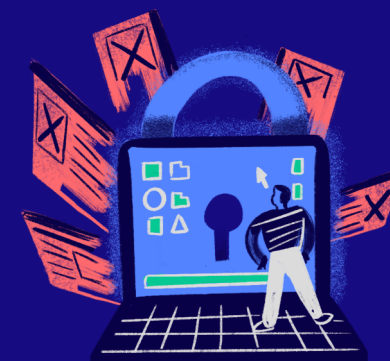

Digital Transformation

The idea is to promote digital and media literacy within the whole school community, by creating a supportive environment that encourages the development of digital competences.

About

Digital Literate project is to capacitate educators in Digital and Media Literacy, through CPD initiatives and hands-on, collaborative approach which will allow not just teachers, but also school leaders and students to increase their Digital skills, in particular those related with digital and media literacy for education.

Timeline and Results Project

The creation of a Digital and Media Literacy training path for educators composed by:

- A capacity building program
- A MOOC
- Live workshops
- Designing of Learning Unit Plans by teachers
- Pilot in classrooms
- Digital Outputs of students
- The creation of a Good Practice Catalogue on Digital and Media Literacy
- Community events

Foster the development of key competencies through CPD.

Targets roles

Here are programs and projects aimed at addressing environmental sustainability:

Teachers

The teachers will focus on developing digital and media literacy, encouraging them to integrate these skills into the classroom.

School leaders

School leaders will be encouraged to enhance digital and media literacy within the community and assist teachers in updating the curriculum.

Students

Students will gain digital and media literacy skills, actively applying new knowledge through creating digital projects.

Families

Parents will be informed about key topics affecting their children's education and encouraged to promote their active learning involvement.
